Lipotype presents the Awardees of the Lipidomics Forum 2018

Dresden / Germany, 19th November 2018

Lipotype proudly presents the winners of best poster and best scientific talk award at the Lipidomics Forum 2018.

The Lipidomics Forum has become home for Lipotype. Besides a shared scientific background, we strive for the same goals such as global scientific excellence and exchange. This is why Lipotype began attending and supporting the conference many years ago.

History of the Lipidomics Forum
The Lipidomics Forum is a joint effort of the ISAS Dortmund and the Research Center Borstel. The annual symposium is a series of conferences on lipid biology and lipidomics to provide a platform for international acknowledged scientists, students and young researchers to interact. It does not only cover current research highlights but also offers tutorials on selected methodical topics.

The awardees
The best poster award was won by Bing Peng (middle frame). She researches blood platelets and their lipid composition which is critical for platelet integrity and functionality. She could show that the lipidome changes upon platelet activation.

The best scientific talk award was won by Marcus Höring (right frame). His work aims at the intestinal lipid metabolism and the influence of gut microbia on these processes. He made use of isotope labeled fatty acids to achieve that.

Dr. Ronny Herzog, Head of Software Development and IT-Infrastructure and the awardees.
Dominik Schwudke (top left frame) and Robert Ahrends (bottom left frame) have bee organizing the Lipidomics Forum since its beginning. To say thank you, Lipotype gifted both a rafting weekend. We are certain, they will enjoy it as much as we enjoy our lipid raft.

About Lipotype
Lipotype delivers comprehensive, absolutely quantitative lipid analysis services for clinical and biological samples on a high-throughput scale. Drawing on many years of cutting edge research experience, Lipotype offers high quality lipid analysis services for a wide range of customers and applications including biomarker identification for clinical researchers, pharma and biotech companies, functional food development for the food industry, claim support for the cosmetics industry, as well as for the small-scale profiling needs of academic researchers.

Lipotype is a spin-off company from the Kai Simons and Andrej Shevchenko labs of the world-renowned Max-Planck-Institute of Molecular Cell Biology and Genetics in Dresden, Germany.

Follow Lipotype on LinkedIn, Twitter and Facebook or subscribe to our Newsletter for regular updates on lipids, lipidomics and Lipotype!
